Toshiba TCx7-RT1 Telematic cash register

Toshiba TCx7-RT1 is the new telematic cash register for the daily transmission of the fees introduced with the D.L.G. of 05/08/2015 No. 127.

Developed for the telematic transmission of payments, it has the breakthrough technology for the telematic transmission, but it is also a cash register.

It offers cutting-edge solutions to improve sale experience, among which the new pull-out keyboard with 2x16 backlit display, the front USB port and the near paper end paper end sensor.

This "easy-loading" printer, in the versions with 58 and 80mm print head, prints Barcodes, QRcodes and graphics on non-fiscal documents. The auto-calibration system and the auto-cutter minimize manual interventions.

With a new design matching its technological heart, this printer is ergonomic and functional, with a compact and minimalist design.

The connections are ensured by USB, micro USB, serial, ethernet and WIFI (optional) ports to connect PC, tablet and smartphone and also other peripherals as scanner, scales, cash drawers and POS.
