

TCx™ 800

New All-in-One Adjustable POS Platform

- > Designed for retail
- > Ultimate flexibility
- > “Just right” technology

The TCx™ 800 all-in-one POS platform is the latest retail innovation from Toshiba that delivers a unique and enriched experience for associates and customers that puts it in a class of its own. Fully functional as a point-of-sale, kiosk or self-service unit, the TCx 800 combines the robust performance and reliability to deliver an exceptional in-store experience. And as an all-in-on system it is bundled together in a single smartly designed configuration that can be positioned anywhere in the store without fear of compromising the in-store experience.

Designed for Retail. Designed for You

Each day, you work hard to engage and support your customers. Now, you can depend on Toshiba to help you with solutions designed for retail. That means the TCx 800 all-in-one retail POS solution is designed to exceed expectations brought by the demands you face daily.

- > Designed to exceed your expectations
- > Designed for speed
- > Designed for security
- > Designed for availability
- > Designed for flexibility

Ultimate Flexibility

As a unified solution, the TCx 800 all-in-one POS system enables the ultimate flexibility you want for your space-limited retail environments.

> Flexible Design

- Ultimate lay-flat adjustable mechanics with color accent possibilities
- Extensive accessory ports and cable management
- Flexible configurations with 3 multi-touch, gesture-based screen sizes

> Flexible Connections

- USB ports that allow mounting of I/O devices to customize appearance and function
- USB 2.0, USB 3.0, and USB-C compatibility
- Selectable and fixed connections available
