TCx[®] SMART | wall

A self-service solution for retailers where space is a key consideration

FLEXIBLE PERFORMANCE IN A SPACE SAVING FOOTPRINT

Part of Toshiba's S-Series of self-service solutions, TCx[®] SMART Series provides **Self-service Modularity** that **Accelerates Retail Transformation**.

Self-service is evolving beyond grocery, where it has historically been most prominent, enhancing the choice of checkout customers now expect to see in other retail verticals. Quick service hospitality, speciality, sports stadiums and even fashion retailers are finding increasing value in providing self-service choices in their stores, especially in space-limited environments where providing self-service wasn't previously possible.

The TCx SMART | wall is a wall mounted self-checkout for locations with a smaller retail footprint. Its modular design has multiple customisation options available that address the unique needs of space constrained retail operations. By offering a wall mount capability, floor space is optimised, accelerating self-service throughput without compromising on space or functionality.

KEY BENEFITS

A small footprint for environments with limited space

Flexible configurations tailorable to each customer requirement

Elegant design aesthetic enables easy customer adoption

Reduced cost of checkout whilst enhancing customer experience

**TOGETHER
COMMERCE**

"Any retailer can take their store to the next level with a modern, smart future-proof self-checkout solution."
