Hardware Guide
Models 2CR and 2NR
November 2020

This edition applies to Toshiba SureMark 4610 Printer Models 2CR and 2NR and to all subsequent releases and modification until otherwise indicated in new editions.

If you send information to Toshiba Global Commerce Solutions (Toshiba), you grant Toshiba a nonexclusive right to use or distribute whatever information you supply in any way it believes appropriate without incurring any obligation to you.

About this guide
This guide contains information about installing, using, and maintaining the Toshiba® 4610 SureMark™ Model 2CR and 2NR printers.

Who should read this guide
This guide is intended for personnel who are installing and using the Toshiba 4610 SureMark Model 2CR and 2NR printers.

Where to find more information
Current versions of Toshiba publications are available on the Toshiba Global Commerce Solutions website at [www.toshibacommerce.com/support/publications](http://www.toshibacommerce.com/support/publications).

The publications listed under the General tab are available to the public.

To access a specific Toshiba product publication:
1. Click on the Hardware, Application, OS, Integration, or Other tab.
2. Scroll to the desired product, and click on Publication Library.
   
   **Note:** Access to the product publications requires valid user credentials. For information on obtaining a user ID and password, click Learn More.
3. Enter your user ID and password.
4. Click Submit.

Additional information
The following publications provide additional information about the 4610 SureMark Models 2CR and 2NR printers:

- **SureMark 4610 Printers: Hardware Service Guide for Models 2CR and 2NR, TC61-5003**
- **SureMark 4610 Printers: Programming Guide for Models 1xR and 2xR, TC62-5005**

Notice statements
Notices in this guide are defined as follows:

**Notes**
These notices provide important tips, guidance, or advice.

**Important**
These notices provide information or advice that might help you avoid inconvenient or problem situations.

**Attention**
These notices indicate potential damage to programs, devices, or data. An attention notice is placed just before the instruction or situation in which damage could occur.

**CAUTION**
These statements indicate situations that can be potentially hazardous to you. A caution statement is placed just before the description of a potentially hazardous procedure step or situation.
DANGER

These statements indicate situations that can be potentially lethal or extremely hazardous to you. A danger statement is placed just before the description of a potentially lethal or extremely hazardous procedure step or situation.
Summary of changes

This section documents the changes for each revision of the SureMark 4610 Printers Hardware Guide Models 2NR and 2CR.

November 2020

This edition of the SureMark 4610 Printers Hardware Guide includes the addition of the following information:

• Warranty statement for the thermal print head and auto cutter

June 2017

This edition of the SureMark 4610 Printers Hardware Guide includes the addition of the following information:

• Setting up and configuring a WiFi adapter
• WiFi configuration and management
• Setting up, managing, and configuring a network printer

© Copyright Toshiba Global Commerce Solutions, Inc. 2017
Chapter 1. Introducing the SureMark 4610 Models 2CR and 2NR printers

The Toshiba SureMark™ 4610 Models 2CR and 2NR are dual station, point-of sale (POS) printers. The SureMark 4610 printer is available in two models:

- Model 2CR provides thermal station and impact station printing for your cash register receipts, check processing, bar codes, and documents.
- Model 2NR provides thermal station and impact station printing for your cash register receipts, bar codes, and documents.

With a print speed of 80 lines per second (LPS) and a 4-inch paper roll diameter, this high-speed printer lets you quickly print long receipts, monitor paper status, and gather printer usage statistics.

![SureMark 4610 printer](image)

Figure 1. SureMark 4610 printer

Features and specifications

The key features of the Models 2CR and 2NR include:

- Print speeds of 80 lines per second (LPS).
- One-hand paper loading with the touch of a button
- System management sensors that alert you to:
  - Close the cover on the printer.
  - Replace the receipt paper.
  - Status of the printhead.
- Efficient replacement of receipt paper and ribbon cartridge, including larger paper rolls to accommodate printing more receipts.
- Three megabytes of memory to store messages, logos, codes pages, and User Define Storage.
- Magnetic ink character resolution (MICR) enables electronic check conversion (Model 2CR only).
Downloadable DBCS fonts for thermal (24x24 matrix) and impact (9x16 or 16x16 matrix) printing.

Table 1 summarizes the specifications of the Models 2CR and 2NR printers.

Communication and power

An interface card is shipped with the 4610 SureMark™ printers to provide communication to the system unit. Depending on your connectivity requirements, you will have one of the cards listed in Table 2.

Network interface adapter prerequisites

The network interface adapters (Ethernet and WiFi) have dependencies on the level of the printer and printer firmware

- The printer manufacturing date must be later than June 10, 2013. The main logic card of printers built prior to June 10, 2013 will not support these adapters. The manufacturing date is located on the bottom of the printer.
- Firmware level 14 and higher is required for an Ethernet interface adapter.
- Firmware level 18 and higher is required for a WiFi interface adapter. Some older versions of firmware will enable basic function, but that function will not match the function described in this manual. These firmware levels will print a message, as part of a test receipt, that indicates the firmware should be upgraded.

Note: The required firmware levels will not allow back-leveling to a version that does not fully support the installed adapter.

If a network interface adapter is installed in a printer that has back level firmware or a main logic card that does not support it, the printer indicates an error:

- The ready light will blink amber and the internal LED#2 will be lit, which indicates that the printer firmware is back level. If the firmware is known to be at the minimum level identified then this condition indicates a failed adapter or other hardware problem,
• A message is printed in the receipt station stating that the main logic card does not support network adapters, which indicates that the main logic card is back level and cannot be used with the installed adapter.

### Operating system requirements

You can download drivers from the Toshiba Global Commerce Solutions support website: [www.toshibaecommerce.com/support](http://www.toshibaecommerce.com/support).

The printer provides a compatibility mode to enable use of older drivers and applications with only minor modifications. The default operating system is referred to as "Native Mode". "Native Mode" provides functional enhancements and is supported by the most current applications and drivers.

[Table 3](#) includes a list of the printer interface options that are supported for each OS/Driver combination.

Note:
1. Toshiba 4610 Ethernet Printer iOS SDK is supported with iOS 8.x or later for use with the Ethernet and WiFi interface adapters.
2. Toshiba 4610 Ethernet Printer Android SDK is supported with Android 4.0 or later for use with the Ethernet and WiFi interface adapters.
3. Only those items listed are supported.

**Hardware requirements**

SureMark printers work with the following systems:
- 4694 systems
- 4695 systems (RS-232 connection only and with power supply)
- PC or other store controller with an RS-232, USB, WiFi, or Ethernet port
- SurePOS 100 Series systems
- SurePOS 300 Series systems
- SurePOS 500 Series systems
- SurePOS 700 Series systems
- Self Checkout solution
- AnyPlace™ Kiosk
- TCx™ Wave
- TCx700
- TCx300
- iOS, Android, and Windows mobile devices

**Identifying the controls and indicators**

This section contains information on the controls and indicators of the 4610 Model 2CR and 2NR printers. Figure 7 provides a diagram of these indicators and controls.

**Locating the power button**

The power button (R in Figure 8) of the Models 2CR and 2NR is located under the paper door. A removable cover is included over the power button.
Understanding the Light-Path LEDs

The light-path LEDs illuminate to indicate a potential problem with the printer. To locate the light-path LEDs, open the paper door to see the LED lights (see Figure 9) on the far right side of the printer. Table 9 includes a description of these indicators.

Calling for service

When you call Toshiba for warranty information or service, be sure to have the serial number and model number of the printer available. The serial number and model number are located beside the flipper door (see S in Figure 10).

Figure 10. Location of serial number
Chapter 2. Product specifications

This section describes the physical specification for Models 2CR and 2NR, including the printer size, temperature guidelines, connector pin assignments, print dimensions, printer speed, printer acoustics, bar codes generated, and resident code pages.

Temperature and humidity limits

Extreme temperatures can impact the performance and durability of the 4610 Model 2CR and 2NR printers. The following list contains the humidity and temperature limits for the 4610 Model 2CR and 2NR printers:
Shipping
-40° to 60° C (-40° to 140° F) with 5% to 100% relative humidity including condensation, but excluding rain

Storage
0° to 60° C (32° to 140° F)

Operating
5° to 40° C (41° to 104° F) with 8% to 80% relative humidity
Chapter 3. Installing and configuring the 4610 printer

This section provides safety information, and steps on installing and configuring your printer.

Before you begin

Before you install your SureMark™ printer, be sure to read this section and the Safety Information manual, GC32-0609.

Verify your order

Your order should contain the following components:

- 4610 printer
- Safety manual
- Ribbon
- Paper roll (specified by the customer)
- Customized printer options (packaged separately), including:
  - Interface card (a RS-232, RS-485, USB, or Ethernet, or WiFi)
  - Fillers
  - Cables
  - Power bricks

Understanding your configuration

Your printer can be set up in an integrated or distributed configuration. An integrated configuration has all parts of a system assembled in one location. A distributed configuration is set up with the parts of the system in different physical locations. In an integrated configuration you can install the printer on the input/output tray option (with the filler that contains the printer and display) on top of the wide-footprint system units. Other tray options include mounting the printer on the full-size cash drawer or directly on the counter.

Installing the interface card

The interface card (either an RS-232, RS-485, USB, Ethernet, or WiFi interface) is shipped in a separate box with your printer. To install the interface card, complete the following steps:
Figure 12. Installing the interface card

1. Place the printer unit on one side, as shown in Figure 12.
2. Align the bottom of the interface card (A) to the slot (B) on the base of the printer and press to secure the latch.
3. Connect the printer with your system unit or network (using the RS-232, RS-485, USB, or Ethernet connector).
   
   **Note:** You can plug all cables into the interface card before installation; however, do not plug in the power until after installation.
4. If you have a power cord, connect it to the printer.

---

**Installing the fillers**

The filler are an important part of your integrated system. They securely position your printer into position with the system unit and other peripherals.

Refer to the installation documentation for your system unit for complete instructions.
Configuring a WiFi adapter

This section provides guidance for setup of the 4610 WiFi Interface Adapter. After completion of WiFi setup, Printer IP setup may be required. See “Configuring a network printer (WiFi and Ethernet)” on page 36 for additional setup instructions. The Printer IP setup is common to both the WiFi and Ethernet adapters.

Note:

1. Prior to installation of a WiFi adapter, the printer firmware must be level 18 or later. All new product will be at this level or later. If upgrading an existing printer see your existing printer documentation for firmware update instructions.
2. If DHCP is used for IP address assignment, the DHCP server must support DHCP Option 61 (Client Identifier). If your DHCP server does not support Option 61, assign a static address to the WiFi adapter. The 4610 printer with WiFi adapter requires 2 IP addresses. Option 61 allows the DHCP server to uniquely identify the two requests. The printer IP assignments will be allocated to the printer MAC address and the WiFi parameters to the Client Identifier.
3. After completion of WiFi setup, it is highly recommended that default passwords be changed and/or unused interfaces disabled.

The 4610 WiFi interface adapter provides a WLAN client connection for normal printer operation and management, plus a separate local connection for setup through a built in access point (referred to as the Printer Access Point or Printer AP). The following is a summary of the operations necessary to setup the WiFi adapter. Details of each step are provided in the following sections.

1. Connect to the Printer Access Point.
2. Log into the WiFi Configuration and Management interface.
3. Setup the WiFi Client.
4. Setup the WiFi IP Parameters and other options.

Following completion of these steps see “Configuring a network printer (WiFi and Ethernet)” on page 36 for the Printer IP setup if not using DHCP for all IP parameter assignment.

Before you begin

The information needed for many of the setup steps is provided by the Test/Status Receipt. This receipt should be printed prior to beginning setup.

Printing the Test/Status Receipt

Follow the steps below to print a test/status receipt.

1. Press and hold both the paper feed and document feed buttons.
2. When the printer-ready indicator begins blinking, release both buttons.
3. Press and release the paper feed button to print the receipt.

Table 11 shows part of a sample test receipt and highlights the items required for setup.
Connecting to the Printer Access Point (AP)

Perform the following steps using a personal computer (or similar device) with a WiFi interface and an Internet browser.

**Note:** The details of connecting to a wireless network will vary from system to system. The following examples and instructions are for Windows 7 without additional wireless tools.

1. Click on the Wireless Network Icon which is typically located at the right of the taskbar.

2. Select the Printer Network from the list of available networks and click **Connect**.
Once the device indicates it has established a network connection, it is ready to log into the WiFi Configuration and Management interface.

**Note:** Some systems report a warning when connecting to the printer AP because there is no internet connection provided. This warning should be ignored.

### Logging into the WiFi configuration and management interface

The printer provides web pages for setup and other management. After connecting to the printer AP network, log into the web pages for setup.

1. Open the browser and enter the AP IP address shown on the test receipt.
2. When prompted, enter the username **admin** and the password **Admin**.

   The Quick Setup page should open as shown below.

   **Note:** If the WiFi adapter had been previously configured the status page will open rather than the Quick Setup.
Quick Setup
Wireless Network (wlan0) Configuration

Current Configuration

<table>
<thead>
<tr>
<th>Network Name (SSID):</th>

</tr>
<tr>
<td>IPv6 DHCP Client:</td>
<td></td>
</tr>
</tbody>
</table>

Available Networks

1. Select the target network from the list of available networks.
2. Enter the required information and click Submit.

The data entry screens will vary based on the target network and its security settings. The example screen below shows the data entry screen for a network using 802.1x security.

Figure 16. Quick Setup Page

Setting up the WiFi client

The WiFi client setup is performed from the quick setup page shown in the previous step.

1. Select the target network from the list of available networks.
2. Enter the required information and click Submit.

The data entry screens will vary based on the target network and its security settings. The example screen below shows the data entry screen for a network using 802.1x security.
Setting WiFi IP parameters

By default IP parameters are obtained by DHCP. If this is the intended operating mode then no further setup is required. However, if all settings are not obtained by DHCP, then IP parameters may be set via the Quick Setup page or Wireless Network Interface Configuration page.

- To use the Quick Setup page, select or enter the required parameters and click Submit.
- To access the Wireless Network Interface Configuration page, select the Network tab and then the Wireless Network - Interface - Configuration menu item.

Note: Host name configuration is only available on the Wireless Network Interface Configuration page. If the default hostname is used, then the quick setup page probably provides all the required settings.

Changing default passwords for WiFi

Default passwords must be changed to ensure that the network remains secure.

To change the Web Interface password, select the Administration tab and then the User Management menu item.

To change the Access Point password and other settings select the Network tab and then the Access Point menu item.
Configuring a network printer (WiFi and Ethernet)

This section provides guidance for setup of a 4610 Network printer (WiFi or Ethernet interface adapter installed). When using a WiFi adapter, it is assumed that WiFi configuration has been completed. See "Configuring a WiFi adapter" on page 31 for information on configuring the WiFi Adapter.

Note:
1. Prior to installation of an Ethernet adapter, the printer firmware must be at level 17 or later. All new product will be at this level or later; if upgrading an existing printer, see the existing printer documentation for firmware update instructions.
2. DHCP is the recommended method for IP configuration. If using DHCP, all settings can be controlled by the DHCP server so no further configuration steps are typically required. The default hostname includes the last 6 characters of the printer MAC address so that each is unique and associated with the printer through the MAC address (which is printed on a label attached to the adapter).
3. After completion of network printer setup, it is highly recommended that default passwords be changed.

The following is a summary of the operations necessary to setup a network printer. Details of each step are provided in the following sections.
1. Log into the Printer Configuration and Management interface
2. Setup the Printer IP Parameters and other options

Following completion of these steps, the printer should be fully accessible via the network.

Before you begin

If setting up a printer with a WiFi Adapter, complete the WiFi setup as described in "Configuring a WiFi adapter" on page 31 and restart the printer before beginning.

The information needed for the setup steps is provided by the Test/Status Receipt. This receipt should be printed prior to beginning setup. See "Printing the Test/Status Receipt" on page 31.

Note: To ensure that all required information is present on the receipt, wait for a minute or 2 following power on of the printer. Actual time will vary based on network setup and DHCP server performance.

Logging into the WiFi Configuration and Management Interface

The printer provides web pages for setup and other management. From a computer attached to the same network as the printer, log into the web pages to use them for setup:

1. Open a browser and enter the IP address shown on the Printer Network Configuration section of the status/test receipt.
2. When prompted, enter the username admin and the password Admin.

The Overview page should be as shown below.
Setting printer IP parameters

By default IP parameters are obtained by DHCP. If this is the intended operating mode then no further setup is required; however, if all setting are not obtained by DHCP then IP parameters may be set via the Network page.

1. Select the Network menu item to display the Network page.
2. Select the required IP Mode and enter the applicable IP parameters.
3. Click Save.
4. Navigate to other pages and complete other setup as required.
5. Reset the printer using the Reset Printer menu item to activate the settings

   **Note:** If the printer is powered off/on before resetting it via the menus, all settings will be lost.

### Change default passwords for printer

Default passwords must be changed to ensure the network remains secure.

To change the Printer Web Interface password, select the **Admin Access** menu item.
Chapter 4. Using and maintaining the 4610 printer

This section contains information about the proper use and maintenance of the 4610 Model 2CR and 2NR printers. For detailed technical information, see Chapter 2, Product specifications on page 27.

Attention: All covers must be installed on the SureMark printers during operation.

Replenishing consumable supplies

You are responsible for replenishing consumable supplies, which includes:

- Paper rolls
- Inserted forms
- Ribbon cartridges

paper rolls. Make sure that you are using the recommended supplies for the 4610 Model 2CR and 2NR printers, which are described in the following sections.

Important: Thermal Print Head Life and Auto Cutter Life are guaranteed only with the use of papers on the TGCS qualified paper list. Use of non-qualified paper sources may result in a shorter lifespan and may result in a billable service call if printer failures are determined by TGCS to be the result of using these papers, regardless of the existence of a service contract or product warranty.

Loading and replacing the paper roll

The 4610 printers can accommodate a four inch printer roll. When your paper roll is running low, the paper supply LED indicator will blink continuously. Once the paper is out, the amber (orange) light of the paper supply LED indicator will remain lit until you replace the roll.

Important: See “Supported paper types” on page 41 to verify that you are using the correct paper for the 4610 Model 2CR and 2NR printers.

To properly install the paper roll, make sure you install the paper with the printing side facing out. The paper should not be attached to the core in any manner. To load a new paper roll, complete the following steps:
1. Press and release the blue release button (P in Figure 19) to release the paper door.
2. If necessary, remove any unused paper or empty paper roll cores from the paper roll bucket before inserting a new paper roll.

Note: Refer to the label inside the rear wall of the printer for a diagram of how to load paper.

Figure 19. Opening the paper door

Figure 20. Paper roll placement
3. Place the paper roll into the paper roll bucket with the leading edge of the paper coming from the bottom of the roll, as shown in Figure 20.

   **Note:** The thermal printhead will not print on paper with glue on it. If the new paper roll was sealed by glue, tear off the 6 to 8 inches of paper with glue on it before loading it.

4. Close the paper cover.

5. Press the customer receipt feed button to advance the paper about 30 cm (about 1 ft.) to test for proper feeding and correct alignment.

6. Tear off excess paper.

   **Attention:** Do not pull the receipt paper out of the printer with the paper access cover closed. This disengages the paper feed. The paper feed motor must then catch up before the printer can feed the paper, which causes missing lines or partial lines of print. Use the customer receipt feed button to advance the receipt, and all lines will print.

### Supported paper types

The type of paper required for the 4610 is dependent on the printer model. The 4610 Models 2CR and 2NR printers require paper that supports both thermal and impact printing.

   **Attention:** Using an inferior grade of paper can affect the print quality, printhead life expectancy, and printer mechanisms.

   **Note:** When selecting a paper, ensure that the paper’s archive life meets the requirements of the tax authorities of your country for archiving tax-related data.

### Thermal paper

The paper used in the thermal receipt station must meet the following requirements:

**Width**

79.5 ± 0.5 mm (3.13 ± 0.02 in.)

**Outside Diameter**

102 mm (4.0 in.) maximum

**Thickness**

57 µm (0.00225 in.) Range: 41 µm (0.0016 inches) minimum to 99 µm (0.0039) maximum

   Paper has a significant manufacturing tolerance and nominal paper designations do not reflect actual measurements. The manufacturing tolerance must fall within the published operating thickness range. You should test paper in your specific configuration before using. If any spot measurement of the paper is outside the specified range, the paper does not meet the paper specification which will result in an end-user error paper jam.

To find supported papers:

2. Select **SureMark™ Printers**.

3. Click on **OEM Paper Testing** under 4610-2CR/2NR to view the supported papers.

   **Attention:** Printer reliability and performance are directly related to the quality of the supplies you use. The published parameters for printer performance are established using supplies that meet the specification listed above.
Thermal paper with watermarks, coupons, or advertisements printed on the front or back of the paper is not covered by Toshiba specification. Some inks and printing processes will work acceptably, while others will not. Printer problems that are caused by supplies that do not meet Toshiba specification might result in a billable service call, regardless of the existence of a service contract.

**Impact printing**

With thermal impact station printing, both models can print up to three parts on a multi-part form. Table 12 lists the specifications of supported single and multi-part forms.

- Test all forms in the printer to ensure acceptable performance prior to buying a significant quantity.
- No binding holes or other holes should be within 10 mm (0.4 in.) from the right edge of the form.
- Forms less than 0.15 mm (0.006 in.) thick with the grain of the paper perpendicular to the feed direction (short-grain paper) should not be used for landscape printing.
- All documents with color will feed properly in the impact printing station. You should verify your documents before use. See Figure 3 for document specification details.

**Table 12. Specifications of supported single and multi-part forms**

<table>
<thead>
<tr>
<th>Specification</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Minimum width:</td>
<td>50 mm (2 in.)</td>

<tr>
<td>Maximum thickness of multi-part forms:</td>
<td>0.47 mm (0.0185 in.)</td>
</tr>
<tr>
<td>Maximum thickness of front sheet, multi-part forms:</td>
<td>0.08 mm (0.003 in.)</td>
</tr>
<tr>
<td>Minimum thickness of single-part form:</td>
<td>0.10 mm (0.004 in.)</td>
</tr>
<tr>
<td>Maximum thickness of single-part form:</td>
<td>0.2 mm (0.008 in.)</td>
</tr>
<tr>
<td>Weight range for single-part forms:</td>
<td>68–90 g/m$^2$ (18–24 #)</td>
</tr>
</tbody>
</table>

For best reliability, paper grain should be in the direction that the paper is fed into the printer.

**Supported documents that are flipped**

The flipping of multi-part forms and short-grain single-part forms is not supported. Table 13 describes the supported flipping specifications.

**Table 13. Supported flipping specifications**

<table>

<td>75–95 g/m$^2$</td>
</tr>
</tbody>
</table>
Loading large paper rolls

You can load extra large paper rolls (up to 15 in.) below the printer to reduce how often you need to replace the paper roll. Mounting hardware is necessary to avoid placing undue strain on the paper feed motor. See your Toshiba representative for additional information.

Replacing the ribbon

When the print quality is not clear, it might be necessary to replace the ribbon on your printer. To replace the ribbon:

1. Open the ribbon door. As the door is opened, the printhead moves to a position where you can easily load the ribbon.

2. If a ribbon cartridge is installed, remove it by lifting it straight up.

   Note: You might need to grasp the body of the cartridge rather than the top to remove it.
3. Maintain ribbon tension by turning the ribbon cartridge knob as shown in Figure 22. Lower the cartridge into position until the notches on its sides snap into place on the printer guides. Correct placement of the ribbon (A) around the printer guides (B).
4. Make sure the ribbon is correctly positioned with the print head guides, as shown in Figure 23.

5. Once the cartridge is in place, close the ribbon cover. The ribbon will be moved into the correct position.

**Supported ribbon types**

**Attention**: Using an inferior grade of ribbon can affect the print quality, printhead life expectancy, and printer mechanisms.

The 4610 Models 2CR and 2NR require a stuffer-bo... ribbon type (feed rollers pull the ribbon from one end of the cartridge and stuff it into the cartridge cavity of the other end). The Epson ERC 35 ribbon meets these specifications; however, other original equipment manufacturers also offer replacements that are adequate.

**Inserting checks (Model 2CR only)**

The Model 2CR printer is capable of printing verification information on a check or an inserted document. You must correctly insert your check or document into the printer to use this printer feature. To correctly insert a check into the printer, complete the following steps, as shown in Figure 24.
Inserting documents from the side

You can also insert documents from the side of the Models 2CR and 2NR printers. If you are inserting a document from the side, complete the following steps:

1. Press the A and B button at the same time (see Figure 25). When you press both button at the same time and then release, the document insert throat opens.

2. Insert the document facedown into the right side of the printer (see Figure 21).

   Note: The throat must be open to insert a document from the side.

3. Press and then release both button again to close the throat.
Button A and B are also used to test the printer.

## Retrieving printer statistics

The Model 4610 2CR and 2NR printers retain usage statistics to help you evaluate your printer’s usage and performance. The statistics available for your printer are defined during printer configuration. System management tools provide usage statistics, and a subset of these usage statistics are printed at the bottom of a Test/Status Receipt.

[Figure 26] is an example of a printed receipt with usage statistics for the 4610 Model 2CR and 2NR printers.
In addition to the Usage Statistics, the printer stores statistics on errors or unexpected events for use in predicate problems. See the SureMark Printers: Programming Guide for Models 1xR and 2xR, TC62-0005 for commands to retrieve this data.

The available statistics for the 4610 Model 2CR and 2NR printers include:

- Unexpected Ribbon Cover Open Count
Cleaning recommendations

You should periodically inspect your 4610 printer and clean the cover as required. Use a soft, clean cloth with warm soapy water to clean the plastic parts. Do not use abrasives or any alkaline, ammonia, or chloride-based cleaner.

Note: Do not apply cleaning solution directly to the cover. Always apply the cleaner on a clean cloth and then wipe the cover with the damp cloth. Be certain that the cloth is only damp and not dripping wet.

Cleaning the MICR read head (Model 2CR only)

You should clean the MICR read head after 10,000 checks are processed, or every three months. Clean the MICR read head using a cotton swab soaked in isopropyl alcohol.

To clean the MICR read head:
1. Open the ribbon door by rotating it downward.
2. Remove the ribbon cartridge by lifting it out.
3. Move the carriage to the right until it stops, or as shown in Figure 27.
4. Prepare a swab with isopropyl alcohol.
5. Gently wipe the head (see M in Figure 27) with the swab several times. Wipe away any residual alcohol with a dry swab.
6. Replace the ribbon and close the ribbon door.

If cleaning the MICR read head does not solve the problem you are having, you might be experiencing electromagnetic noise interference. Sources of electromagnetic noise (for example, displays, security towers, and other sources) can interfere with the MICR read head. The printer is equipped to filter noise from many devices. If the MICR read head does not function properly, rearranging the printer relative to the noise source might improve MICR reading. The noise source should be as far away as possible from the right side of the printer.

### Cleaning the thermal printhead

The thermal printhead should be cleaned at regular intervals or when the print quality has noticeably deteriorated. There are many factors that affect cleaning frequency. Poor paper quality, high printer usage, or a dirty environment are all reasons to clean the thermal printhead more often. Complete the following steps to clean the thermal printhead:

1. Open the paper cover by pushing the large blue button on the top of the printer.
2. Using a cotton swab soaked in isopropyl alcohol, gently wipe the printhead several times on its print line and on the surrounding area.
3. Wipe off any residual alcohol with a dry swab.

If print quality does not improve after cleaning the thermal printhead, contact your Toshiba Global Commerce Solutions service Representative.

## Clearing jams in the check flipper area

If a check jams in the check flipper mechanism, you can remove the flipper door to clear the jam. Complete the following steps to clear a paper jam:
1. Lift up the left front corner of the flipper door (document insert cover) and pull the cover from the printer (see Figure 29).
2. If the document is visible, remove the document.
3. Replace the flipper door.

4. If you cannot remove the document, lift up the tab on the left side of the check flipper cartridge (with a blue label) and remove the check flipper cartridge from the printer (see Figure 31).
5. Reach inside the document insert station and carefully remove the jammed check.
6. Reinstall the check flipper cartridge and the flipper door.

Telecommunication regulatory statement

This product is not intended to be connected directly or indirectly by any means whatsoever to interfaces of public telecommunications networks, nor is it intended to be used in a public services network.

Electronic emission notices

When you attach a monitor to the equipment, you must use the designated monitor cable and any interference suppression devices that are supplied with the monitor.

Federal Communications Commission (FCC) statement

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference, in which case the user will be required to correct the interference at his own expense. There is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Reorient or relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
4. Consult the dealer or experienced radio TV technician for help.

Properly shielded and grounded cables and connectors must be used in order to meet FCC emission limits. Toshiba Global Commerce Solutions is not responsible for any radio or television interference caused by using other than recommended cables and connectors or by unauthorized changes or modification to this equipment. Unauthorized changes or modification could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

FCC Radiation Exposure Statement

To comply with the FCC RF exposure compliance requirements, the separation distance between the antenna and the body of all persons must be at least 20 cm (8 inches).

Industry Canada Class A Emission Compliance statement

This Class A digital apparatus complies with Canadian ICES-003 and RSS247.

Operation is subject to the following two conditions:

1. This device may not cause interference.
2. This device must accept any interference, including interference that may cause undesired operation of the device.
Avis de conformité à la réglementation d'Industrie Canada

Cet appareil numérique de la classe A est conforme aux normes NMB-003 et RSS247 du Canada.

Le fonctionnement est soumis aux conditions suivantes :
1. Ce périphérique ne doit pas causer d’interférences;
2. Ce périphérique doit accepter toutes les interférences reçues, y compris celles qui risquent d’entrainer un fonctionnement indésirable.

Industry Canada Radiation Exposure Statement

This equipment complies with IC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 cm (8 inches) from the body of all persons.

European Union Electromagnetic Compatibility (EMC) Directive Conformance Statement

This product is in conformity with the protection requirements of EU Council Directive 2004/108/EC on the approximation of the laws of the Member States relating to electromagnetic compatibility. Toshiba Global Commerce Solutions cannot accept responsibility for any failure to satisfy the protection requirements resulting from a non-recommended modification of the product, including the fitting of non-Toshiba Global Commerce Solutions option cards.

This product has been tested and found to comply with the limits for Class A Information Technology Equipment according to CISPR 32/European Standard EN 55032. The limits for Class A equipment were derived for commercial and industrial environments to provide reasonable protection against interference with licensed communication equipment.

Attention This is a Class A product. In a domestic environment this product may cause radio interference, in which case the user may be required to take adequate measures.

Des Weiteren dürfen auch nur von der Toshiba Global Commerce Solutions empfohlene Kabel angeschlossen werden. Toshiba Global Commerce Solutions übernimmt keine Verantwortung für die Einhaltung der Schutzanforderungen wenn das Produkt ohne
Zustimmung der Toshiba Global Commerce Solutions verändert bzw. wenn Erweiterungskomponenten von Fremdherstellern ohne Empfehlung der Toshiba Global Commerce Solutions gesteckt/eingebaut werden.

Deutschland: Einhaltung des Gesetzes über die elektromagnetische Verträglichkeit von Geräten

Dieses Produkt entspricht dem „Gesetz über die elektromagnetische Verträglichkeit von Geräten (EMVG)“. Dies ist die Umsetzung der EU-Richtlinie 2004/108/EG in der Bundesrepublik Deutschland.

Zulassungsbescheinigung laut dem Deutschen Gesetz über die elektromagnetische Verträglichkeit von Geräten (EMVG) (bzw. der EMC EG Richtlinie 2004/108/EG) für Geräte der Klasse A

Dieses Gerät ist berechtigt, in Übereinstimmung mit dem Deutschen EMVG das EG-Konformitätszeichen - CE - zu führen.

Verantwortlich für die Einhaltung der EMV Vorschriften ist der Hersteller:

Toshiba Global Commerce Solutions
3901 South Miami Blvd.
Durham, NC 27703
United States of America

Der verantwortliche Ansprechpartner des Herstellers in der EU ist:

Toshiba Global Commerce Solutions, Inc.
Brand Manager - Europe, Middle East & Africa
Toshiba Court, Weybridge Business Park, Addlestone Road, Weybridge, Surrey, KT15 2UL, UK

Generelle Informationen:

Das Gerät erfüllt die Schutzanforderungen nach EN 55024 und EN 55032 Klasse A.

Australia and New Zealand Class A statement

Attention : This is a Class A product. In a domestic environment this product may cause radio interference, in which case the user may be required to take adequate measures.

Aviso para los usuarios de México

La operación de este equipo está sujeta a las siguientes dos condiciones:

1. Es posible que este equipo o dispositivo no cause interferencia prejudicial.
2. Este equipo o dispositivo debe aceptar cualquier interferencia. Incluyendo la que pueda causar su operación no deseada.

Para saber el modelo de la tarjeta inalámbrica utilizada, revise la etiqueta regulatoria de la impresora.

People’s Republic of China Class A electronic emission statement

Attention : This is a Class A product. In a domestic environment this product may cause radio interference, in which case the user may be required to take adequate measures.
Russian Electromagnetic Interference (EMI) Class A statement

ВНИМАНИЕ! Настоящее изделие относится к классу A. В жилых помещениях оно может создавать радиопомехи, снижения которых необходимы дополнительные меры

日本Voluntary Control Council for Interference Class A statement

Attention: This is a Class A product based on the standard of the Voluntary Control Council for Interference (VCCI). If this equipment is used in a domestic environment, radio interference may occur, in which case, the user may be required to take corrective actions.
Japan Electronics and Information Technology Industries Association (JEITA) statement

Japan Electronics and Information Technology Industries Association (JEITA) Confirmed Harmonics Guidelines with Modification (products greater than 20 A per phase).

Korean communications statement

이 기기는 업무용(A급)으로 전자파적합기기로 서 판매자 또는 사용자는 이 점을 주의하시기 바랍니다. 가정외의 지역에서 사용하는 것을 목적으로 합니다.

This is electromagnetic wave compatibility equipment for business (Type A). Sellers and users need to pay attention to it. This is for any areas other than home.

Taiwan Class A compliance statement

警告使用者：
這是甲類的資訊產品，在居住的環境中使用時，可能會造成射頻干擾，在這種情況下，使用者會被要求採取某些適當的對策。

Taiwan contact information
Cable ferrite requirement

All cable ferrites are required to suppress radiated EMI emissions and must not be removed.

Electrostatic discharge (ESD)

**Attention**: Electrostatic discharge (ESD) damage can occur when there is a difference in charge between the part, the product, and the service person. No damage will occur if the service person and the part being installed are at the same charge level.

**ESD damage prevention**

Anytime a service action involves physical contact with logic cards, modules, back-panel pins, or other ESD sensitive (ESDS) parts, the service person must be connected to an ESD common ground point on the product through the ESD wrist strap and cord.

The ESD ground clip can be attached to any frame ground, ground braid, green wire ground, or the round ground prong on the AC power plug. Coax or connector outside shells can also be used.

**Handling removed cards**

Logic cards removed from a product should be placed in ESD protective containers. No other object should be allowed inside the ESD container with the logic card. Attach tags or reports that must accompany the card to the outside of the container.

Product recycling and disposal

This unit must be recycled or discarded according to applicable local and national regulations. Toshiba Global Commerce Solutions encourages owners of information technology (IT) equipment to responsibly recycle their equipment when it is no longer needed. Toshiba Global Commerce Solutions offers a variety of product return programs and services in several countries to assist equipment owners in recycling their IT products. Information on Toshiba Global Commerce Solutions product recycling offering can be found on the Toshiba Global Commerce Solutions product recycling programs website.

Español: Esta unidad debe reciclarse o desecharse de acuerdo con lo establecido en la normativa nacional o local aplicable. Toshiba Global Commerce Solutions recomienda a los propietarios de equipos de tecnología de la información (TI) que reciclen responsablemente sus equipos cuando éstos ya no les sean útiles. Toshiba Global Commerce Solutions dispone de una serie de programas y servicios de devolución de productos en varios países, a fin de ayudar a los propietarios de equipos a reciclar sus productos de TI. Se puede encontrar información sobre las ofertas de reciclado de productos de Toshiba Global Commerce Solutions en el sitio web Toshiba Global Commerce Solutions product recycling programs.
Note: This mark applies only to countries within the European Union (EU) and Norway.

Appliances are labeled in accordance with European Directive 2012/19/EU concerning waste electrical and electronic equipment (WEEE). The Directive determines the framework for the return and recycling of used appliances as applicable throughout the European Union. This label is applied to various products to indicate that the product is not to be thrown away, but rather reclaimed upon end of life per this Directive.

Remarque : Cette marque s’applique uniquement aux pays de l’Union Européenne et à la Norvège. L’étiquetage du système respecte la Directive européenne 2012/19/EU en matière de Déchets des Equipements Electriques et Electroniques (DEEE), qui détermine les dispositions de retour et de recyclage applicables aux systèmes utilisés à travers l’Union européenne. Conformément à la directive, ladite étiquette précise que le produit sur lequel elle est apposée ne doit pas être jeté mais être récupéré en fin de vie.

In accordance with the European WEEE Directive, electrical and electronic equipment (EEE) is to be collected separately and to be reused, recycled, or recovered at end of life. Users of EEE with the WEEE marking per Annex IV of the WEEE Directive, as shown above, must not dispose of end of life EEE as unsorted municipal waste, but use the collection framework available to customers for the return, recycling, and recovery of WEEE. Customer participation is important to minimize any potential effect of EEE on the environment and human health due to the potential presence of hazardous substances in EEE. For proper collection and treatment, contact your local Toshiba Global Commerce Solutions representative.

Disposal of IT products should be in accordance with local ordinances and regulations.

Battery safety

警告： 本电池包含锂。为避免爆炸，请勿焚烧电池或对其充电。
请勿：把电池投入或浸入水中、把电池加热到 100°C (212°F) 以上、修理或拆卸。 (C003)

注意
用错误型号电池更换会有爆炸危险
务必按照说明处置用完的电池

Caution: Risk of explosion if battery is replaced by an incorrect type. Dispose of used batterie according to the instructions.
Battery return program

This product may contain sealed lead acid, nickel cadmium, nickel metal hydride, lithium, or lithium ion battery. Consult your user manual or service manual for specific battery information. The battery must be recycled or disposed of properly. Recycling facilities may not be available in your area. For information on disposal of batteries outside the United States, go to the Battery disposal website or contact your local waste disposal facility.

警告: 如果更换不正确的电池型号会爆炸的危险。请按制造商说明书中使用的电池。

电池回收计划
本产品可能包含铅酸、镍镉、镍氢、锂或锂离子电池。有关电池的信息，请参阅用户手册或维修手册。必须正确地回收处理。在中国地区可能没有回收设施。有关在美国之外处理电池的信息，请访问 http://www.ibm.com/ibm/environment/products/batteryrecycle.shtml，或与当地的废电池处理机构联系。

For Taiwan:

![Battery Recycling Logo]

Please recycle batteries

For the European Union:

![Crossed-Out Battery Symbol]

Notice: This mark applies only to countries within the European Union (EU)

Batteries or packaging of batteries are labeled in accordance with European Directive 2013/56/EU concerning batteries and accumulators and waste batteries and accumulators. The Directive determines the framework for the return and recycling of used batteries and accumulators as applicable throughout the European Union. This label is applied to various
batterie to indicate that the battery is not to be thrown away, but rather reclaimed upon end of life per this Directive.

Les batteries ou emballages pour batteries sont étiquetés conformément aux directives européennes 2013/56/EU, norme relative aux batteries et accumulateurs en usage et aux batteries et accumulateurs usés. Les directives déterminent la marche à suivre en vigueur dans l’Union Européenne pour le retour et le recyclage des batteries et accumulateurs usés. Cette étiquette est appliquée sur diverses batteries pour indiquer que la batterie ne doit pas être mise au rebut mais plutôt récupérée en fin de cycle de vie selon cette norme.

In accordance with the European Directive 2013/56/EU, batteries and accumulators are labeled to indicate that they are to be collected separately and recycled at end of life. The label on the battery may also include a chemical symbol for the metal concerned in the battery (Pb for lead, Hg for mercury and Cd for cadmium). Users of batteries and accumulators must not dispose of batteries and accumulators as unsorted municipal waste, but use the collection framework available to customers for the return, recycling and treatment of batteries and accumulators. Customer participation is important to minimize any potential effect of batteries and accumulators on the environment and human health due to the potential presence of hazardous substances. For proper collection and treatment, contact your local Toshiba Global Commerce Solutions representative.

This notice is provided in accordance with Royal Decree 106/2008 of Spain: The retail price of batteries accumulators and power cells includes the cost of the environmental management of their waste.

For California:

Perchlorate material – special handling may apply

Refer to [www.dtsc.ca.gov/hazardouswaste/perchlorate](http://www.dtsc.ca.gov/hazardouswaste/perchlorate).

The foregoing notice is provided in accordance with California Code of Regulations Title 22, Division 4.5, Chapter 33: Best Management Practices for Perchlorate Materials. This product/part includes a lithium manganese dioxide battery which contains a perchlorate substance.

Flat panel displays

The fluorescent lamp in the liquid crystal display contains mercury. Dispose of it as required by local ordinances and regulations.

Monitors and workstations

Oregon: For information regarding recycling covered electronic devices in the state of Oregon, go to the Oregon Department of Environmental Quality site at [http://www.deq.state.or.us/lq-electronics.htm](http://www.deq.state.or.us/lq-electronics.htm).
