# TOSHIBA

Built to Adapt: *How Modular POS Powers the Future of Retail*

What is Modular POS?

Mix-and-match technology that adapts to your store's unique needs
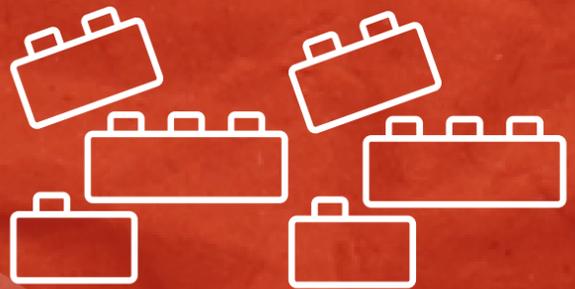

- Customize hardware and software features
- Test tools in real-time environments
- Replace or upgrade components with ease

80%
of success now depends on how fast you adapt*

Modular POS systems are built for that speed and flexibility

Retailers face constant change through shifting customer preferences and evolving tech

Think of Modular POS Like Building Blocks

Snap In What You Need

Swap Out What You Don't

Scale Up When You Grow

Did You Know?

Upgrading doesn't mean starting over. Modular tech keeps what works and adds what's next

Retailers are upgrading faster than ever. The POS software market is growing at 12.6% annually through 2030*

Adapt Fast & Learn Faster

- Test new tech in real-time
- Fail small and move on quickly
- Stay ahead of innovation without high risk

People-First Technology

Modular POS doesn't just serve tech goals, it also supports your people

For Customers:
- Faster checkout
- Mobile payments
- Personalized options
- Stress-free experience

For Retailers:
- Simple onboarding
- Less tech fatigue
- Smarter staffing with A.I. insights

The future belongs to retailers who adapt with innovation
Modular POS gives you the tools to evolve without disruption
Retail doesn't stand still, your tech shouldn't either
